

# About Our Patients

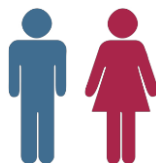

In 2018, 1,364 individuals and their families chose Kessler Institute - Chester for their inpatient rehabilitation. Although their diagnoses and rehabilitation needs were different, they shared a common goal: **to gain the skills, strengths and strategies to rebuild their lives.**

Patients were admitted to Kessler Institute with a range of **diagnoses**.

Spinal Cord Injury	Brain Injury	Stroke	Neuro-logic	Cardiac	Ortho-pedic	Amputa-tion	General Rehab
14	175	292	61	97	414	27	284

Overall, our **patient population** was 48% female and 52% male, but varied by diagnosis.

Spinal Cord Injury	Brain Injury	Stroke	Neuro-logic	Cardiac	Ortho-pedic	Amputa-tion	General Rehab
57% FEMALE	44%	51%	51%	46%	62%	19%	51%
43% MALE	56%	49%	49%	54%	38%	81%	49%

Our patient population also varied greatly by **age** – ranging from 17\* to 100 years old, with an average age of 74 years.

	Spinal Cord Injury	Brain Injury	Stroke	Neuro-logic	Cardiac	Ortho-pedic	Amputa-tion	General Rehab
<b>AGE (AVG)</b>	64 YEARS	70 YEARS	72 YEARS	68 YEARS	78 YEARS	75 YEARS	68 YEARS	78 YEARS
<b>18-35</b>	0%	6%	1%	0%	0%	1%	0%	1%
<b>36-60</b>	36%	29%	17%	23%	5%	12%	30%	6%
<b>61-75</b>	50%	31%	36%	52%	27%	32%	44%	35%
<b>→75</b>	14%	34%	46%	23%	68%	54%	26%	58%

The majority of our **spinal cord injury** patients (79%) had non-traumatic injuries. Among our **brain injury** patients, 43% sustained a traumatic injury and 57% a non-traumatic injury. In addition, 93% of our patients with lower extremity limb loss had a unilateral **amputation**, 7% bilateral.

\* One Individual ages 16 and 17 were treated in our diagnostic programs

**Restoring Hope. Rebuilding Lives.**
